

**Mumbai Educational Trust's
Institute of Information Technology
C#.Net Programming**

Assignment #1

Using C# Programming do the following:

- 1) Implement Banner class as a struct (value type) in c# (Write it as Banner.cs). Write a program in another C# file and test this Banner struct type.**
- 2) Implement Interest Calculation method as a static method in an Investment class. This method takes principle as double, rate as float and period as int. Write a test program in another Program class and call the static method to calculate and display interest on the console**

Note: Program should be according to convention followed in class codes.
